

Mobilux offers high-class leading technical innovation, design versatility and user-configurable options compatible within the office/commercial environment, while offering a wide range of accessories and cabinet design variations.

SIDE 2 SIDE

Mobilux Side 2 Side perfectly matches any type of shelving or storage cabinets. Existing shelving systems can be adapted/fitted, or a totally new cost-efficient system can be designed, allowing you to maximise and increase your storage capacity in long narrow spaces.

HAND DRIVE

Mobilux Hand Drive slides easily on floor rails and is suitable for smaller storage areas. Perfect for storage along corridors, the unique integrated handle offers a clean appearance and modern design with ease of access.

MECHANICAL DRIVE

Mobilux Mechanical Drive System is designed to give an easier and more convenient use of larger storage units. Only the lightest touch is needed to operate the system, while its unique handle design ensures a pleasant and uniform appearance with ease of mobility for the user.

ELECTRICAL DRIVE

Mobilux Programmable Electrical Drive is best suited for medium to large storage needs, where individual access control is required. Originally designed for usage where the storage of confidential documents and limited access is critical. The intelligent design is applied to ensure the security and integrity of the items stored and the safety of all users due to infrared sensors while operating.

APPLICATIONS & SOLUTIONS

Mobilux.. the latest customer orientated high quality solution from Tellus, whether it's for the office, hospital, government, warehouse, commercial, retail or home environment. We are continuously listening, researching, developing and providing state of the art systems to match the ever changing demands of our customers, including drawers, hanging files, book dividers, steel partitions, hanging clothes rail and decorative laminate fascia, Tellus has it all.
